

EU20i advanced design

Super quiet operation
Revolutionary technology and sound proofed casing, keep operational noise to that of a typical business office

Pure power
Honda's unique Inverter technology produces 2000W of clean and smooth power, essential for computers or other sensitive electronic equipment

Superb efficiency
Unique EcoThrottle® runs only as fast as the load demands, improving fuel consumption and extending engine life

Lightweight and compact
Easy to carry, transport and store

Spill-free refuelling
Extra wide filler cap for easy filling

Dual sockets
Power or recharge two products simultaneously

Parallel operation
Two units can be linked to provide 3600W (optional cables available)

Sturdy platform
Rubberised feet minimise vibration and movement

Powerful enough to run larger appliances yet light enough to carry with ease. Whoever you need reliable power you can rely on the EU20i, backed up with the peace of mind of Honda's 5 year warranty.

Pure power

The EU20i shares all the benefits of being really portable, super quiet and very efficient – but with twice as much of that smooth, pure power. Now just imagine all the things you can do with it.

Delivering 2000 watts of portable power, the EU20i is the ultimate leisure generator for the more demanding user. This tough and compact unit is powerful enough for all kinds of tasks where you don't have access to the mains – whether you're abroad in the caravan or motorhome, working at the end of the garden, entertaining outdoors or even to provide emergency back-up when there's the inevitable power cut.

Honda's exclusive Inverter technology gives you unsurpassed power stability to run even the latest high tech electronics safely through the twin 230V outlets. And although the EU20i has enough capacity to power a microwave oven or several appliances simultaneously, its unique EcoThrottle means the EU20i is frugal too. At the flick of a switch this feature only runs the engine as fast as the load demands, enabling the EU20i to run for over ten hours on a single tank of fuel, with minimal noise and fuel cost and maximum engine life.

Key features

- Powerful 2000W output with dual 3-pin AC sockets will power a microwave oven
- Super-quiet – just 52dB(a) at 7m
- Lightweight for portability – only 21kg
- 10.5hrs running time on a single tank at 1/4 load
- Inverter technology for clean, stable power and improved efficiency
- Stylish and ergonomic design for ease of use
- 12V 8A DC output for charging batteries
